## Product Information

# Analog Pulse Converter STU500

- Switch selectable input signal 0/4..20 mA, 0/2..10 V DC and Potentiometer
- Bistable output voltage 0/12 V DC
- Indicators for power and output

## Characteristics

STU500 converts an analogue input signal into a bistable output signal 0/12V DC. The duty cycle of the output signal is proportional to the input signal level. It can be used for power control in heating circuits in combination with solid state relays (SSR).
