## Digital photo-radiometric probes

- Fast and accurate
- Interchangeable
- Low power
- Solid stand due to aluminum construction
- Optional ACCREDIA certification available

### DESCRIPTION

DX 6x1 is a series of digital photo-radiometric probes for the PRO D01 / PRO D05 handheld meters.

The probes measure:

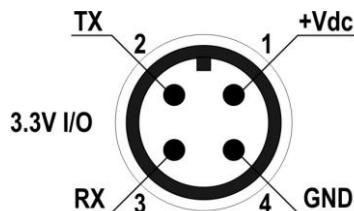

- Illuminance
- Luminance
- Irradiance (specific probes for UVA, UVB, UVC, UVBC and Blue light ranges available)
- PAR (Photosynthetically Active Radiation)

The probes are supplied factory-calibrated, and they are ready to use. The probes can be optionally supplied with a ACCREDIA calibration certificate.

The calibration data are stored in the probe, allowing for interchangeability without the need for recalibration.

Optionally available with integrated bubble level to facilitate horizontal positioning.

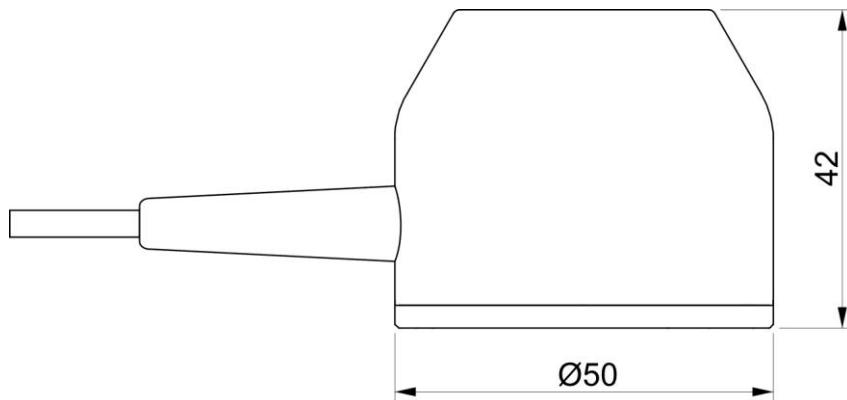

Equipped with 4-pin M12 connector.
