

## Product information

# Bar Graph Display BA4824N

- Universal version for 0/4..20 mA, 0..10 V DC
- Red LED indicator (optionally green)
- Vertical and horizontal installation
- All areas can be selected via connecting terminal
- Display area adjustable via potentiometer

## Characteristics

Series BA bar graph displays are especially well suited for representing continuously changing measurements. With their small design, they can be easily integrated into control panels and diagrams.

The version BA4824N is especially well-suited for processing input signals 0/4..20 mA, 0..10 V DC (limit value adjustable from 5..50 V DC). Adaptation to the corresponding input signal takes place via the connecting terminal. The display zero point and limit value can be adjusted via separate potentiometers.
