

PRODUCT INFORMATION
GHM GROUP

Flow.
Variable Area.

Characteristics

System

- Durchfluss Schwebekörper

Evaluation

- Anzeigen, Schalten, Messen

Nominal widths

- DN 4..50

Range

- 0,0002..4000 l/min

Media

- Wasser, Gase, Öle, aggressive Medien

Pressure resistance

- max. 15 bar

Temperature

- -20..+100 °C

Function and benefits

The sinker measurement principle is a proven method for the precise measurement of liquid and gaseous media. A lifting body is moved vertically in a transparent tube and indicates the current flow by the respective position on the housing scale.

The immediate display of the position without further functional components enables a very precise measurement result. In the event that magnets have been integrated in the sinker, actuation can take place with limit value contacts or sensors arranged on the measurement tube. In this respect, the sinker system also presents a possibility for monitoring the flow or the generation of a linear, continuous output signal.

Applications

- **Display of small flows**
- **Biogas plants**
- **Inert gas monitoring in welding equipment**
- **Flow display of spindles**

Media

If the process data of an application changes so that the flow meter designed for the original process conditions no longer displays correct values, a conversion factor can be calculated for the present scale if the parameters are known.

It must be observed that the results of these formulae are approximate values, which can be applied well with minor deviations from the original calibration conditions. With larger deviations, the measurement device should be completely reconfigured.

Instructions for gaseous media

Calculation of the correction factor F_{ges}

The scale values refer to standard litres of air at 1.013 bar (absolute) and 0 °C. If operating conditions are changed, the conveyed quantity changes according to the accompanying formulae and tables.

Correction factor $F_{ges} = F_T \times F_P \times F_\rho$

Einfluss der Temperatur

Calculation of the correction factor F_T

$$F_T = \sqrt{\frac{\text{calibration temp. in K}}{\text{operat. temp. in K}}} = \sqrt{\frac{0^\circ\text{C} + 273}{\text{operating temp. in }^\circ\text{C} + 273}}$$

Example for 30 °C

$$F_T = \sqrt{\frac{0^\circ\text{C} + 273}{30^\circ\text{C} + 273}} = 0,95$$

Influence of the operating pressure

Calculation of the correction factor K_p

$$F_P = \sqrt{\frac{\text{operating pressure in bar abs.}}{\text{calibration pressure in bar abs.}}}$$

Example at 5 bar

$$F_P = \sqrt{\frac{5,000 \text{ bar abs.}}{1,013 \text{ bar abs.}}} = 2,22$$

Influence of the density of the gas

Calculation of the correction factor K_r

$$F_\rho = \sqrt{\frac{\text{density of air}}{\text{density of the gas at } 0^\circ\text{C}}}$$

Example based on the gas argon

$$F_\rho = \sqrt{\frac{1,292 \text{ kg/m}^3}{1,784 \text{ kg/m}^3}} = 0,85$$

Gas	Chemical formula	Density kg/m ³ bei 0 °C	Correction factor F_r
ammonia	NH3	0,64	1,42
argon	Ar	1,78	0,85
butane	C4H10	2,71	0,69

Flow Meter GR-065GK

- Minimum measurement quantity
- Convex cut for enlargement
- Optionally valve
- Good resistance to medium

Characteristics

A float moves in a transparent conical measurement tube, relative to the flow. The position of the float depends on the volume flow (weight force versus resistance to flow), and indicates the flow rate on the scaled measurement tube.

Technical data

Switch	without
Nominal width	DN 4
Process connection	female thread 1/8" NPT
Metering range	0.002..43.3 l/min
Q _{max.}	120 % of full scale value
Tolerance	±5 % of full scale value
Pressure resistance	PN 12 bar
Medium temperature	-20..+90 °C
Ambient temperature	-20..+70 °C
Media	water, gases
Electrical data	none
Materials medium-contact	borosilicate glass , glass, stainless steel, FKM
Non-medium-contact materials	glass, CW614N valve: ABS, CW614N
Weight	0.5 kg
Installation location	vertical inwards flow from below

Ranges

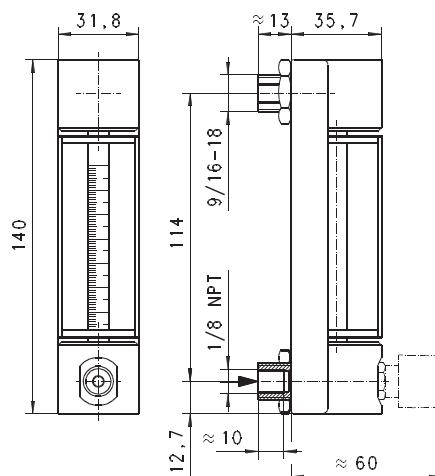

The details in the table correspond to a vertical inwards flow from below.

The metering ranges for air correspond to a temperature of the medium of 0 °C and a pre-pressure of 1.013 bar.

The scale has millimetre divisions. With the aid of the conversion diagrams included in the scope of the delivery, the flow rate can rapidly be determined.

Options

- Metering ranges and special scales under defined operating pressures / temperatures

Ordering information

- Specify direction of flow, medium, and display range.
- For gases, state pressure (relative or absolute), temperature and medium (e.g. air) (request display range)

Flow Indicator/ Switch VL

- Optionally switching contact

Characteristics

A piston moves in a transparent glass tube, relative to the flow. The position of the float depends on the volume flow (weight force versus resistance to flow), and indicates the flow rate on the scaled glass tube.

Technical data

Flow indicator VL

Nominal width	DN 15..25	
Process connection	female thread G 1/2..G 1	
Display range Q _{max.}	0.1..50 l/min 50 l/min	for details see table "Ranges"
Tolerance	±5 % of full scale value	
Pressure resistance	PN 10 bar	
Medium temperature	-20..+100 °C	
Ambient temperature	-20..+70 °C	
Media	water (oils, gases and aggressive media available on request)	
Materials medium-contact	Brass construction: CW614N nickelated, Duran 50, hard ferrite, NBR	Stainless steel construction: 1.4571, Duran 50, hard ferrite, FKM
Weight	see table "Dimensions and weights"	
Installation location	vertical inwards flow from below	

Switching contact VLR

Switch	reed switch
Switching range	0.1..50 l/min, for details see "Ranges"
Tolerance	±5 % of full scale value
Ambient temperature	-20..+70 °C
Wiring	normally open (n.o.) no. 0.372
Switching voltage	max. 230 V AC
Switching current	1 A
Switching capacity	50 VA
Protection class	2 - safety insulation
Ingress protection	IP 65
Connection	plug DIN 43650-A / ISO 4400
Non-medium-contact materials	PC, PA, NBR, nickelated brass
Weight	0.02 kg

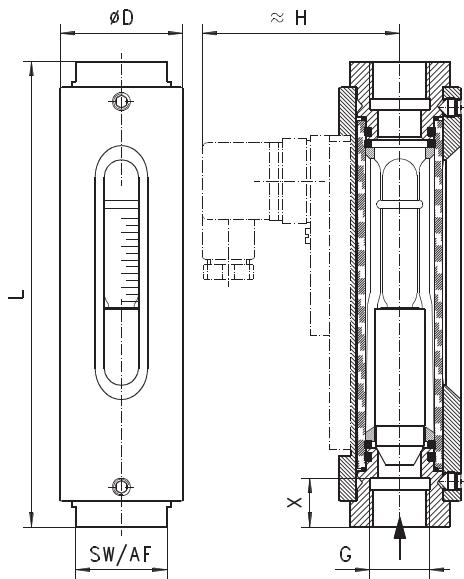

Ranges

For switching ranges, the details in the table correspond to vertical inwards flow from below, and decreasing flow rate; for display ranges they correspond to vertical inwards flow from below and increasing flow rate.

G	Display/ Switching range l/min H ₂ O	Q _{max.} recommended	Types

50	GKL-050M..	63	G 2¾	433	350	24	103	1.5

Handling and operation

- Include straight calming section of 5 x DN in inlet and outlet
 - If the media are dirty, install a filter
(use magnetic filter for ferritic components).
 - Pay attention to the operating temperature/pressure

KM	stainless steel with magnet			

Options

- Metering ranges and special scales under defined operating pressures / temperatures

Accessories

- GKEH-1251 / GKEL-1252
 - GKK-1270
 - GKI-1272

Ordering information

- Specify direction of flow, medium, and display range.
 - For gases, state pressure (relative or absolute), temperature and medium (e.g. air) (request display range)

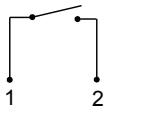

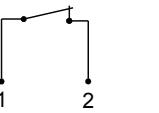

Additional Devices For GK / GKL

GKEH-1256 / GKEL-1257

for types GK-010 / GK-015 / GK-020

Technical data

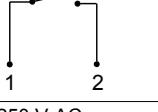

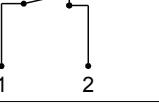

Switch/sensor	bistable reed switch (grid)
Wiring	GKEH-1256 maximum limit value transmitter normally open (n.o.) No. 0.372 
	GKEL-1257 minimum limit value transmitter normally closed (n.c.) No. 0.441 
Switching voltage	max. 250 V AC
Switching current	max. 0.2 A
Switch performance	max. 10 VA
Protection class	2 - safety insulation
Ingress protection	IP 65
Connection	DIN 43650-B plug
Non-medium-contact materials	PBTP, PA
Weight	0.035 kg

GKEH-1251 / GKEL-1252

for types GK-025 / GKL

Technical data

Switch/sensor	bistable reed switch (grid)
Wiring	GKEH-1251 maximum limit value transmitter normally open (n.o.) No. 0.372 
	GKEL-1252 minimum limit value transmitter normally closed (n.c.) No. 0.441 
Switching voltage	max. 250 V AC
Switching current	max. 0.2 A
Switching capacity	max. 10 VA
Protection class	2 - safety insulation
Ingress protection	IP 65
Connection	DIN 43650-B plug
Non-medium-contact materials	PBTP, PA
Weight	0.075 kg

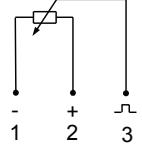

GKK-1270 / 1271 GK-1272 / 1273 / 1273-1

GKK

GKK-1271 for types GK-
GKK-1270 for types GKL-

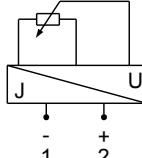

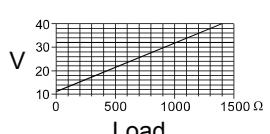

Technical data

Switch/sensor	reed switch chain
Wiring	no. 0.451
	
Supply voltage	max. 24 V DC
Output signal	0..10 kOhm
Protection class	2 - safety insulation
Ingress protection	IP 65
Connection	DIN 43650-B plug
Non-medium-contact materials	ABS, PA
Weight	0.1 kg

GKI

GKI-1273 for types GK-010 / GK-015 / GK-020
GKI-1273-1 for types GK-025
GKI-1272 for types GKL-

Technical data

Switch/sensor	reed switch chain with integrated 2-wire transducer
Wiring	no. 0.452
	
Supply voltage	11..40 V depending on the load
	
Load	max. 1500 Ohm
Output signal	4..20 mA
Protection class	2 - safety insulation
Ingress protection	IP 65
Connection	DIN 43650-B plug
Non-medium-contact materials	ABS, PA
Weight	0.1 kg
