

Pharmaceutical, Medical, Healthcare Processes Validation & Monitoring

Application Fields

for Processes Monitoring and Instruments Validation

Tecnosoft wide range of temperature and pressure data loggers is suitable for many applications thanks to their design, stainless steel housing, IP68 protection degree

Healthcare / Medical Field

Washer-disinfectors Steam Sterilizers Freeze Dryers for Lyophilization Refrigerators, Freezers, Ultra Freezers Laboratories Autoclave Mapping and Validation Hydrogen Peroxide Autoclave Plasma units and sample monitoring

Pharmaceutical Field

Steam Sterilizers Autoclave Validation and Mapping Freeze Dryers for Lyophilization Cold storage Incubators Refrigerators, Freezers, Ultra Freezers Laboratories

Compliance & Standards

Tecnosoft systems are compliant with the relevant standards and guidelines:

| ISO 17665 | Sterilization of health care products and routine control of a sterilization process for medical devices | | | | | | |
|--------------------|--|--|--|--|--|--|--|
| ISO 13060 | Small steam sterilizers - Manufacturers | | | | | | |
| ISO 15883 | Washer disinfectors - General requirements, terms and definitions and tests | | | | | | |
| UNI EN 285 | Sterilization - Steam sterilizers - Large sterilizers | | | | | | |
| FDA 21 CFR Part 11 | US FDA regulations | | | | | | |
| GAMP5 | Guidelines for good automated manufacturing practice | | | | | | |

Temperature, Pressure, Humidity: the data loggers

All loggers are provided with a calibration certificate traceable to a national standard and host a user replaceable battery.

| | Probe: -40°C ÷ +500°C (depend- ing on model) | | absolute | P: U bar ÷ 5 bar absolute | mbar | RH (not condensing) | RH (not condensing) | |
|------------|--|------------------------------------|----------------------------|------------------------------|--|-------------------------|--|--|
| Accuracy | ± 0,1°C (± 0,05°C upon request) | ± 0,1°C (± 0,05°C upon request) | T: ± 0,1°C P: ± 15 mbar | T: ± 0,1°C P: ± 15 mbar | T: ±0,1°C P: ±0,0003 mbar (0,005 ÷ 0,01 mbar) | H: ± 1,8% RH (0% | +60 °C) / ± 0,5 °C (-20 °C ÷ +125 °C) | |
| Resolution | 0,01°C | 0,01°C | 0,02°C | 0,02°C | T: ± 0,1°C P: 0,0001 mbar (0,02 ÷ 10 mbar) | T: 0,015 °C H: 0,02% | T: 0,015 °C H: 0,02% | |

Validation Kit

No matter how big or tough is the job that lays ahead, we will provide you a tailor made kit with the exact number of devices needed to complete it. You can chose any combination of temperature and pressure data loggers, all supplied in an elegant case with the required accessories and software.

The kit includes

- High Temperature Data Loggers with Calibration Certificates
- Pressure Data Loggers with Calibration Certificates
- Humidity Data Loggers with Calibration Certificates
- TS Manager Software, FDA 21 CFR Part 11 and GAMP 5 compliant
- Single or Multiple Reader Station for data downloading and device programming
- Spare batteries for all devices
- Universal Opening Tool for battery change

Reader Stations

DiskInterface HS

USB Reading Base for connecting, downloading data, programming all models of data loggers.

Universal multibay

USB Multiple Reading Base allows to connect, download, program up to 5 data loggers simultaneously.

TS Manager

Validation Software for autoclaves, compatible with FDA 21 CFR Part 11 regulations.

The TS Manager is an advanced validation software developed according to **21 CFR Part 11 and GAMP** guidelines.

The software enables the user to collect, display and analyse validation data from all Teconosoft high temperature, pressure and humidity devices and has all features and all reports needed for validators of autoclaves, incubators in the healthcare & medical industry. The intuitive interface of software puts in your hands a powerful tool but very easy to use. Create your database of Customers and Instruments to validate, create validation profiles to analyse the processes, start your loggers and then download them and check all data collected. The IQ/OQ protocols are also available from Tecnosoft.

- Data in the devices not editable
- Data in software not editable
- Access for each user through a login and password
- Client/server setup and shared database
- Multi-user access
- Multi-level users, with different functions for each level
- Electronic Signature for report printing
- Customers and validated Instruments database for validators activity
- Audit Trail: recording, not editable, of all carried out operations
- Data analysis through pre-set or customizable parameters
- Possibility of pre and post mission comments
- Vasualization in graph, with zoom, and table
- Possibility to generate Analysis Groups from single Sections. You can have more than one test on a graph and divide each test to analyse it separately
- Multi graph analysis

- Graph divided into Sections with analysis and statistics for each section
- Possibility to generate Analysis Groups from single Sections. You can have more than one test on a graph and divide each test to analyse it separately
- Synchronized data table with statistics for each acquisition: maximum, minimum, average, maximum-minimum, maximum-average, average-minimum
- Theoretical temperature calculation based on pressure in saturated steam environment
- Customizable parameters: acquisition step, mission duration, analysis type (lethality with Z and reference temperature values setting, Overkilling for validation , Vacuum Leak Test)
- Print of customizable reports with company logo and layout of the printed sections
- Data and reports export in HTML and XLS (MS Excel) format
- Calculated parameters: Lethality (F0, PU, A0, Vacuum Leak, Maintenance Time, Limits exceeding)Languages: Italian, English, German

Process Analysis

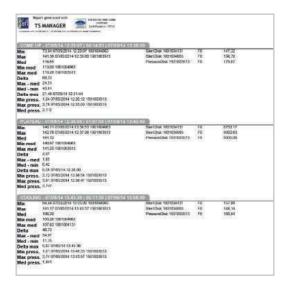

TS Manager offers several tools to analyse your data. A complete **HTML report** is displayed with all the details from your process: type of analysis, result, logger used, operator who programmed and downloaded it, all data acquired.

The **Graph** has zoom feature, vertical and horizontal markers to set points for analysis both on temperature and pressure (you can define a part of graph to analyse and calculate span between max and min, time span etc.). You can also customize the grid of the graph easily. The **Data** tab allows for a quick reading of all the data, statistics such as max, min and average and the profile analysis with the result according to expected values. You can also export data to Excel or other format file.

Printed Report

TS Manager lets you print **complete reports of your processes**, with header image of your company and all the useful data to track the mission. You can choose to print graph, data table. Reports are printed according to regulations and can be signed on each page by the validator or the operator. Multi graph reports can be created thanks to the Group function: select all the missions you want to include in a new group and TS Manager will show all curves and data into a single graph and table. Sections can be generated to highlight different phases of the process and analysis are made on each section. Finding a mission is extremely easy thanks to a large set of filters. Quickly scroll through all the data acquired (date, time, temperature and pressure, eventually), look at the mission's statistics, like number of acquisitions, duration, maximum, minimum and average values for temperature and pressure. Export all the data, not only the acquisitions, but also all mission's details, to an Excel file. Analyse the data acquired using the chosen profile or select other profiles from the drop-down list. Add comments: create custom comments and load them automatically, to save time and create quick reports.
